

Strengthening Fragile Health Systems in Mali: Musso & Focusing Philanthropy

CAMPAIGN GOALS

1

CARE for all our patients, without delay, without interruption

2

PROTECT our brave health care providers on the front lines

3

ACCELERATE the government's national response to stop viral transmission through faster case detection, faster care, and faster isolation

CAMPAIGN OUTPUTS

CONTACT TRACING & MONITORING

- Training for Tracers, Monitors, Supervisors, and Coordinators
- PPE for Tracing & Monitoring teams
- Payment and support for Tracing & Monitoring teams

PROTECTING HEALTH WORKERS

- Equipping CHWs, Supervisors and Facility staff with masks, gloves, eyes protection and gowns
- Paid sick leave for CHWs
- Sanitation and hygiene supplies

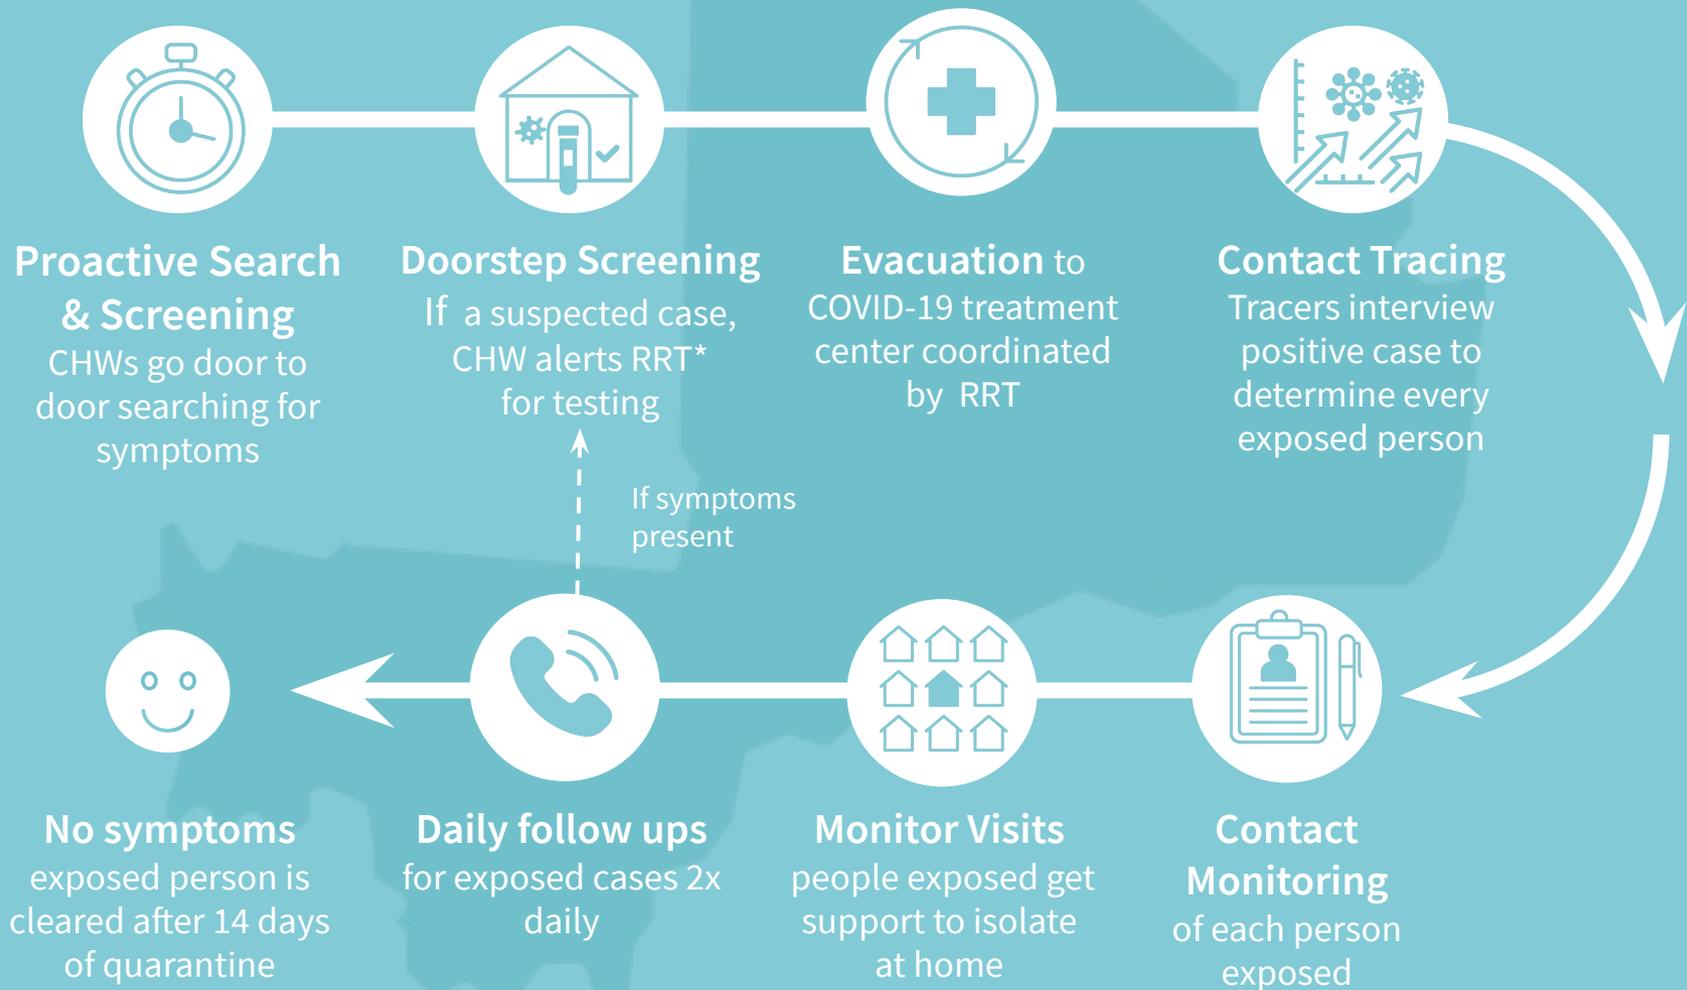

OXYGEN TRAINING

- Training for National, Regional and District level health care workers on oxygen therapy and Helping Babies Breath (HBB) through management of hypoxia and newborn resuscitation
- Training of technicians on the repair and maintenance of oxygen concentrators
- PPE for trainers

CONTACT TRACING & MONITORING

CONTACT TRACING STRATEGY

CONTACT MONITORING

- Proactive monitoring of contacts by dedicated teams
- Check-ins by phone
- In-person follow-up if needed
- Monitoring twice per day: morning and night

CONTACT ISOLATION

- Monitoring agents evaluate the living situation of a contact to give adapted advice on isolation strategies
- No specific quarantine sites: **contacts stay at home** with the rest of their household
- **Instructions given:** the contact must wear a mask, sleep and eat alone, and respect a distance of 2 meters with other members of their household

RESULTS OF CAMPAIGN

Tracers

+

Monitors

+

Supervisors

Coordinators

+

Teams deployed in
7 Regions &
28 Districts

PROTECTING PROVIDERS

PROTECTING PROVIDERS

+

+

+

**Direct protection
of frontline
providers:** CHWs,
Supervisors, and
clinic providers

**Technical
Assistance**
Supporting
national
estimation of
PPE needs

**Identification
of potential
sources of
PPE**

**Ensuring paid
sick leave and
supplemental
providers** in areas
Musso serves

PROTECTING PROVIDERS

- **431 CHWs** have been equipped with Personal Protective Equipment (PPE) including: **masks, gloves, gowns, goggles and sanitization supplies**, as well as **paid sick leave** since March 2020.
- **178 health workers** that comprise our **Contact Tracing and Monitoring Team** have been **fully equipped with PPE** to ensure safe visits with suspected cases.
- **148 Government healthcare workers** have been supplied with PPE.

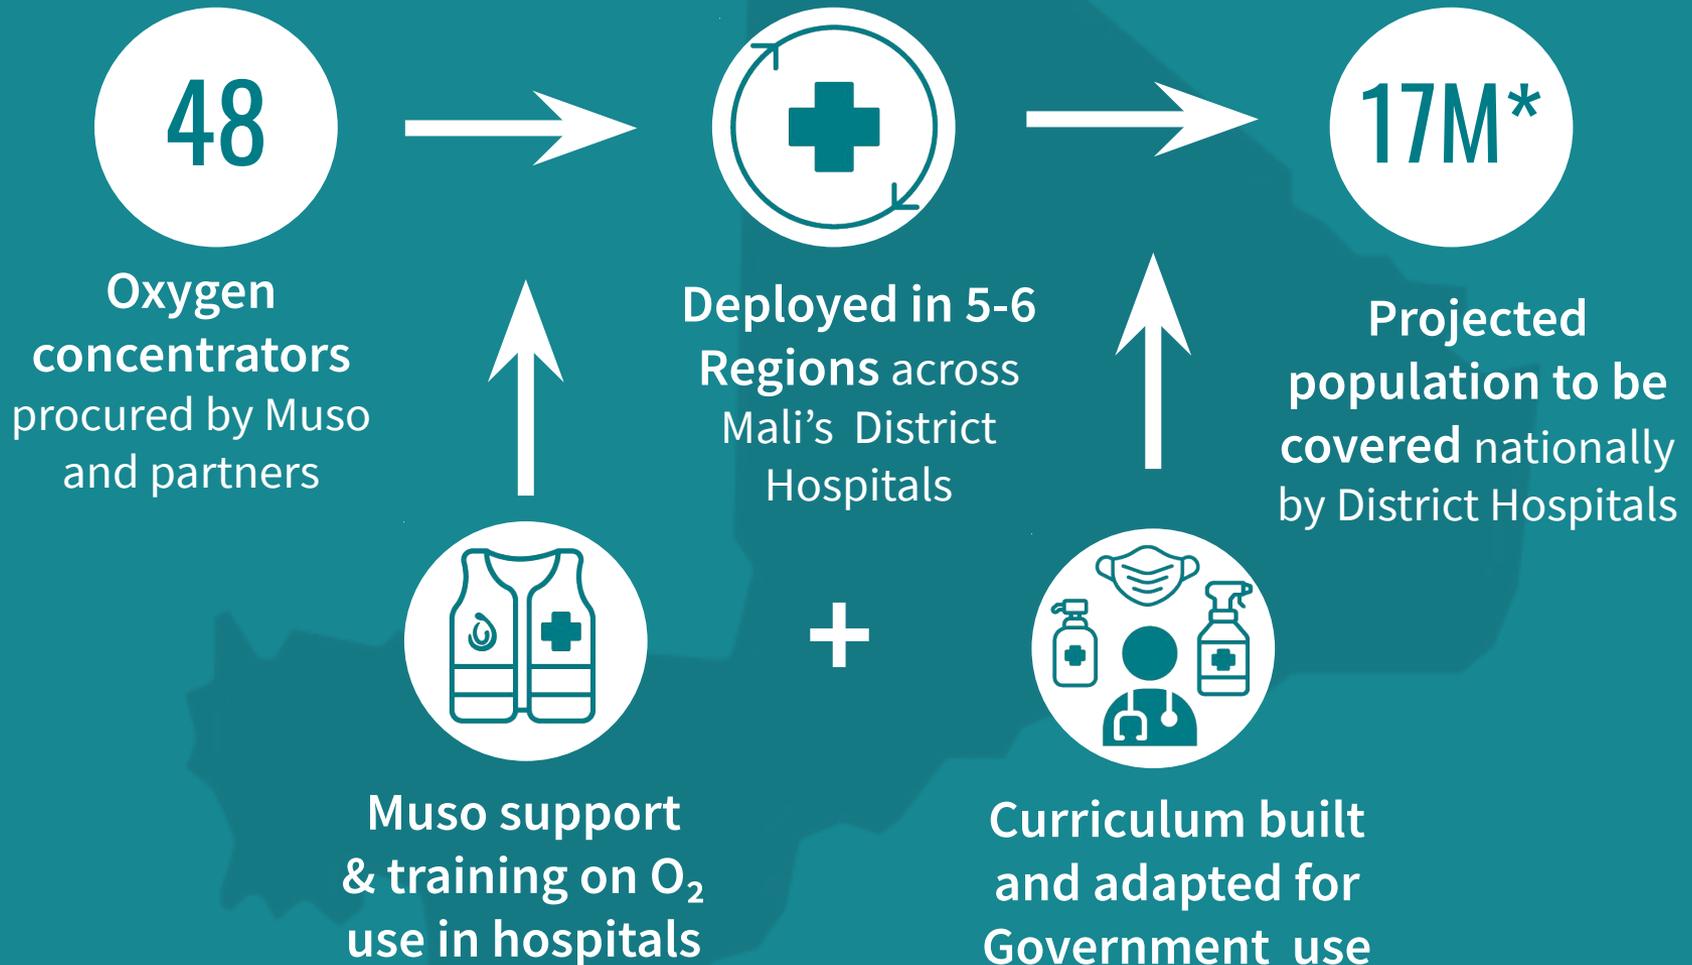

OXYGEN TRAINING

Mali's facilities have minimal access to oxygen, limited intensive care units, and few ventilators. To our knowledge, no secondary referral hospitals in the country had oxygen equipment available for hospitalized patients at the start of the COVID-19 outbreak. Oxygen is critically important in the context of COVID-19 and for pneumonia, an ongoing leading cause of child death.

MUSO SUPPORT ON NATIONAL OXYGEN EFFORT

* Mali has a population of 19M across 59 districts. Concentrators will be deployed based on oxygen need by region, to serve up to 48 districts. This estimate is provisional, as the government will ultimately deploy based on COVID-19 needs. This will ultimately determine the total population covered.

MUSO SUPPORT ON NATIONAL OXYGEN EFFORT

- **1,000** health care workers across **52 district hospitals** have been trained in **oxygen therapy and HBB** (helping babies breath through management of hypoxia and newborn resuscitation).
- **200** technicians have been trained in **the repair and maintenance of oxygen concentrators**.
- **11 National level health care workers** have been trained in **oxygen therapy and HBB** (helping babies breath).

Muso is grateful to our partnership with Focusing Philanthropy that has enabled us to support Mali's National COVID-19 Reponse.
